Ornamentation in Hindustani Vocals Dataset - Annotator's Readme

Hi All!

Thank you so much for being a part of the annotation process for this Hindustani dataset. Let's get started!
You should be added to the shared google drive for this project. If not, please contact me.
Please downloaded the Sonic Visualizer software as per your system's OS. You'll be using this software to annotate the files.

Google Drive overview

The google drive that you've been added to contains the following –

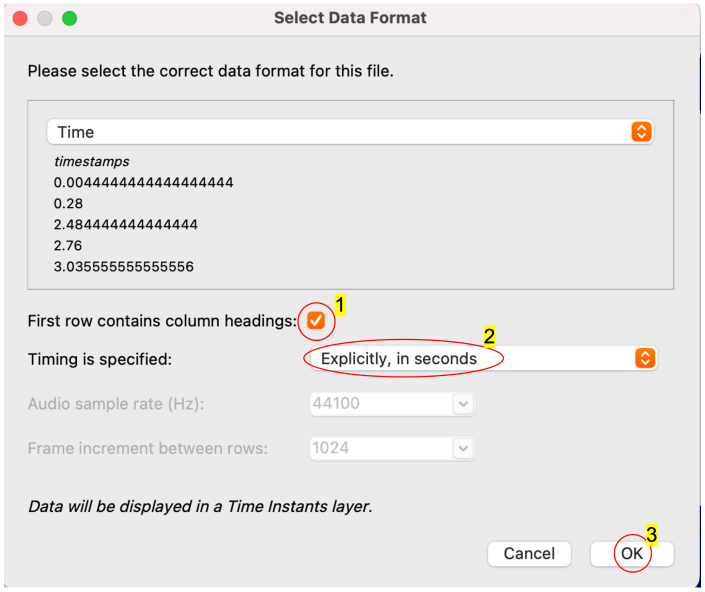
1. **Annotator** folder - contains folders per annotator. You'll be saving your exported csv files in your respective folder.
2. **StarterFiles** folder- contains all the sonic visualizer (.sv) files which contain the file you should open in the Sonic Visualizer software to annotate.
3. **FilesToAnnotate.xlsx -** excel sheet with a list of all the starter files, ragas names, **"Annotator1"** and **"Annotator2"** columns.
    a. We are aiming to get 2 annotators to annotate each file. It is your choice which files you want to annotate.
    b. When a file is ready to be annotated, the cell next to the raga under **"Ready_to_annotate"** will be green and ready for you to choose from. When you choose a file to annotate, please enter your name next to the raga under either "Annotator1" or "Annotator2", whichever is the first empty column. If both are full, please choose another file to annotate.

Exporting your annotations to csv

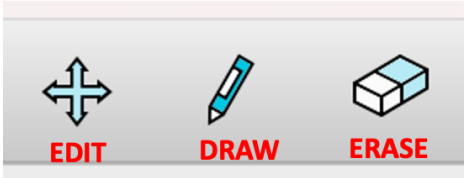
File > Export Annotation Layer > choose csv. File name: **filename_yourinitials.csv.**
Eg: filename_rj.csv

Annotation in Sonic visualizer

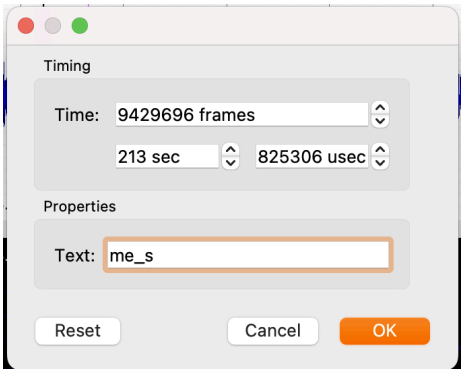
1. Open Sonic Visualizer
2. Drag and drop the mp3 audio file and then the .sv/.csv starter file into Sonic Visualizer
3. If you see the following dialog box open up while dragging the starter file (.sv) into Sonic Visualizer, choose the options as shown in the image below steps 1, 2 and 3.



4. Annotate using the following tools. Note: If they are grayed out, click on the annotation layer (#4) on the right panel. Please let me know if the icons are still grayed out.:



1. **Edit tool** : CLick on the edit tool to be in edit mode. Double click on a time instant (shown by the purple line) that you want to annotate. Enter the label in the text field of the dialog box that opens (as shown in the screenshot below) and click OK. This tool can also be used to move **annotations that you added. Note: Please use the moving functionality only to move the annotations added by you. Please do not move any of the original annotations present in the starter file.**



2. Draw tool : Use this when you want to add your own new annotation (purple line) at a time instant.
3. Erase tool: Use this to remove a time instant (purple line) **that you added**. **Please use the erasing functionality only to erase the annotations added by you. Please do not erase any of the original annotations present in the starter file.**
4. The usual undo redo shortcuts work in the tool for annotations.

5. Remember to save your annotation .sv file as you are annotating every 5-10 mins! (in order to avoid data loss in case something goes wrong).
6. Please follow the conventions given in the following table while labeling the ornamentation timestamps. Please let me know if you have any questions (or if you have suggestions, we can discuss!)-

Sno	Ornament/articulation technique	Label	Other notes
1.	Kan	**k_s** and **k_e**	
2.	Gamak	**g_s, g_e**	
3.	Murki	**mu_s, mu_e**	
4.	Meend	**me_s, me_e**	
5.	Andolan	**a_s, a_e**	
6.	Khatka	**kh_s, kh_e**	
7.	Zamzama	**z_s, z_e**	
8.	Compounded ornaments	**c_<name(s)>_s, c_<name(s)>_e** **You can name the added ornaments between the c and ce time markers by the regular conventions (i.e without the c)**	If you think there are multiple ornamentations in the marked region, you can label them as c and ce for "compound" ornaments. You are free to add more instances of purple lines for ornaments using the pencil tool.
9.	Others	**o_<name>_s, o_<name>_e**	If you think that the marking has an ornamentation that is different from the 5 written above, please label them as o_name_s, o_name_e. *Eg, o_khatka_s and o_khatka_e.*
10.	None	**none**	If you feel that the region does not have any ornamentation, please annotate it as "none".

Again, please feel free to contact me if you get stuck anywhere. Thank you again for being a part of this!
